ADEYEMI PELUMI DANIEL

Full-Stack Developer (Hexcode) | TypeScript, React, Next.js, Node.js, Python (FastAPI), React Native

Ibadan, Nigeria · Open to remote, hybrid and contract roles · adeyemipelumi1980@gmail.com · +234 902 161 5849
Portfolio: hexcode-portfolio.vercel.app · GitHub: github.com/animinatesphere · LinkedIn: linkedin.com/in/adeyemi-pelumi-daniel-a98727372

SUMMARY

Full-stack developer building web apps since 2023 (certified web developer, Sheda House Academy), with 1.5+ years of professional experience shipping production web and mobile products. Built and maintain the full platform for a UK cleaning company: booking and Stripe subscription system, admin panel, an AI receptionist on phone and WhatsApp, and two React Native apps live on the App Store. Experienced with payments (Stripe, Paystack, Flutterwave), real-time video (LiveKit), AI integrations (Claude, Gemini) and multi-role platforms. Looking for junior to mid-level full-stack roles, remote or contract.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML5, CSS3

Frontend: React, Next.js, Vite, Tailwind CSS, Framer Motion, GSAP, responsive and accessible UI

Mobile: React Native, Expo (EAS builds, OTA updates), Flutter, Ionic

Backend: Node.js, Express, FastAPI, REST APIs, JWT authentication, PostgreSQL, MongoDB (Mongoose), database migrations

Payments & integrations: Stripe (subscriptions, saved cards), Paystack, Flutterwave, Twilio (WhatsApp, voice), Claude API, Gemini API, LiveKit, Cloudinary

Testing & DevOps: Jest / Vitest / Playwright, GitHub Actions (CI), Git, VPS deployment, Vercel, Figma

EXPERIENCE

Full-Stack Developer (Web + Mobile) — Cleaniq Services, Manchester, UK (Remote)

May 2026 – Present · Website, admin panel, backend API, two mobile apps and an AI receptionist

- Built the booking and quote system (React 19, Vite, Tailwind, Node.js/Express, MongoDB) with services, extras, frequencies, scheduling, coupons and Stripe checkout, with every quote saved as a lead.
- Implemented regular-clean subscriptions with Stripe saved cards: automatic charging before each visit with retries, pause/cancel fees and rolling visit creation.
- Built one admin panel for job tracking, calendar and availability, rotas, quotes, PDF invoices, CRM, staff pay, commissions and email campaigns.
- Built an AI receptionist on WhatsApp and phone (Twilio, Claude API) that answers questions, quotes from live prices and saves every enquiry as a lead.
- Shipped two React Native (Expo) apps to the App Store — Cleaniq Services (customers) and Cleaniq Service Pro (cleaners) — with job matching, job-status flow, chat, push notifications and OTA updates via EAS.
- Pre-rendered pages for SEO, built 12 location landing pages and an AI blog autopilot that drafts and schedules posts.

Tech Lead — SiteOrbit (Remote) · siteorbit.space

2026 – Present · Platform for learning tech skills and launching a tech career

- Lead the technical side of SiteOrbit, including its courses and learning paths for new developers.

Freelance Full-Stack Developer — Remote

Nov 2025 – Apr 2026 · Client projects alongside building my own SaaS, ClientFlow

- **Cheeseball** (cheeseballapp.com) — crypto trading platform: built the React and Tailwind front end and Python backend for users to buy and trade Bitcoin.
- **The Africa Laureate Awards** (theafricalaureateawards.org) — built the book submission and payment flow in React and Tailwind with Paystack (NGN) and Flutterwave (USD); added server-side verification of payment amounts to block underpaid transactions.
- **BlackQuill Digital Agency** (preview) — website for a Nigerian digital agency serving authors and publishers (pre-launch).

Frontend Developer — Roots and Square

Aug 2025 – Oct 2025

- Built the front end of Siiqo (siiqo.com), Roots and Square's Next.js commerce platform with a buyer marketplace and vendor storefronts.
- Improved load times with lazy-loading and responsive image optimisation; added Framer Motion and GSAP micro-interactions.

Frontend Developer Intern — Dimatech Consultancy

Apr 2025 – Aug 2025

- Built a responsive school portal in React with Framer Motion and GSAP.
- Worked with designers and backend developers to deliver pixel-perfect UI.

PROJECTS

iConnect — Social Community Platform · iconnectdworld.com

Oct 2026 – Nov 2026 · React, Vite, Tailwind CSS, FastAPI, Python, PostgreSQL, LiveKit

- Built a live, web-first platform combining a social feed, communities, 24-hour statuses, jobs and marketplace listings behind authenticated API routes.
- Built private messaging with edits, photo attachments, voice notes and read receipts, plus an AI assistant via a server-side Gemini API integration.
- Integrated real-time video with self-hosted LiveKit broadcasts and live chat; added request validation, rate limiting and database migrations.

ClientFlow — Cold Email SaaS (in development) · clientflow-io.vercel.app

Nov 2025 – Present · React, Node.js, VPS hosting

- Founder and sole developer of a subscription cold-email platform for businesses.

EDUCATION

- **Web Developer Certification** — Sheda House Academy — Oct 2023
- Independent projects, 2023 – 2024: built and shipped personal projects in React, Node.js and Python before my first role.
